

Currently on our simulation platform: linked with two Flight Simulator positions

a European Project
to
assess

Contract of Objectives

 **CATS** contracts will provide well-defined objectives for each actor involved on a flight.

 **CATS** objectives represent the commitment of each actor for delivering the aircraft inside temporal and spatial intervals.

 **CATS** objectives are located on the transfer of responsibility areas, all actors being accountable for their own achievements.

 **CATS** objectives are negotiated based on schedule integrity at destination, taking into account all the actors' constraints.

 **CATS** contracts will ensure the operational continuity of the flight.

Project Coordinator: Christoph.RIHACEK@frequentis.com

Project retained for funding by European Commission for the 6th Framework Program.
