the European Commission

# Monthly Network Operations Report

**Overview – April 2019**

# 1. SUMMARY

Traffic in April 2019 increased by 1.4% compared to April 2018 and was aligned with the baseline forecast. Ten states added more than 50 flights daily to the network with France, Spain and Italy as the top contributors.

En-route ATFM delays (32,447 min/daily) increased by 1.0% and airport ATFM delays (13,757 min/daily) increased by 4.3% compared to April 2018.

There were, on average, 757 daily flights with an en-route ATFM delay of at least 15 minutes (+7.1% compared to April 2018).

Highlights include:

Lisbon airport became a fully operational A-CDM airport on 16 April. Lisbon is the third A-CDM airport connected to the network via B2B.

*En-route:*

- High en-route capacity delays in Karlsruhe UAC;
- High ATC staffing delays in Marseille and Brussels ACCs;
- ATC industrial action in Budapest on 17 April;
- Implementation of new ATM system in Bucuresti ACC.

*Airport:*

- Strong winds impacted operations strongly at Lisbon airport;
- Aerodrome capacity issues and familiarisation with the new electronic flight strips at Amsterdam/Schiphol airport generated high delays.

The average en-route ATFM delay per flight in the NM area<sup>i</sup> in April was 1.07 min/ft, which is well above the corresponding monthly guideline<sup>ii</sup> value of 0.32 min/ft. The average YTD en-route ATFM delay per flight in 2019 in the NM area<sup>i</sup> is 0.71 min/ft which is three times the corresponding guideline of 0.20 min.

## 2. TOTAL TRAFFIC

Traffic increased by 1.4% in April 2019<sup>iii</sup>.

Average daily traffic in April 2019 was 30,289, the highest ever recorded for April.

## 3. ATFM DELAYS

Average ATFM delay per flight decreased from 1.6 min/ft in March 2019 to 1.5 min/ft in April 2019.

En-route ATC capacity (33.0%), en-route ATC staffing (24.8%), airport weather (11.7%) and airport capacity (10.1%) were the main causes of ATFM delays in April 2019.

## Top 20 delay locations (min) in April 2019

These are the top 20 delay generating locations for the reporting month with respect to total ATFM delays. Figures are the average daily delays in minutes for the individual locations.

- High en-route capacity delays in Karlsruhe UAC;
- High ATC staffing issues in Marseille and Brussels ACCs;
- Familiarisation with the new electronic flight strips at Amsterdam/Schiphol airport generated high delays;
- Implementation of new ATM system in Bucuresti ACC generated delays;
- Aerodrome capacity issues in conjunction with military exercises in the vicinity of Lisbon airport;

## 4. EN-ROUTE ATFM DELAY MONITORING

**Reporting month:** The average en-route ATFM delay per flight in the NM area<sup>i</sup> in April was 1.07 min/flt, which is well above the corresponding monthly guideline<sup>ii</sup> value of 0.32 min/flt.

**Year To Date:** The average YTD en-route ATFM delay per flight in 2019 in the NM area<sup>i</sup> is 0.71 min/flt which is three times the corresponding guideline of 0.20 min/flt.

ATC staffing issues in Brussels, Marseille, Karlsruhe, Nicosia, Vienna and Reims; ATC capacity issues in Karlsruhe, Nicosia, Budapest, Barcelona, Reims and Madrid ACCs; Implementation of new ATM system in Bucuresti ACC.

## Year-to-date average daily en-route delays

En-route capacity, ATC staffing and ATC capacity delays are above last year's level. The main contributors are:  
*En-route weather* (-45.5%) in Karlsruhe, Vienna, Budapest, Maastricht and Canarias ACCs;  
*En-route events* (-70.9%) in Bucuresti, Maastricht, Madrid and Zurich ACCs;  
*En-route disruptions* (-59.3%) in Amsterdam ACC;  
*En-route capacity* (+29.7%) in Karlsruhe, Nicosia, Maastricht, Madrid and Bremen ACCs;  
*En-route ATC disruptions* (-19.1%) in Brussels, Langen, Lisbon, Bucuresti and Marseille ACCs;  
*En-route ATC staffing* (+71.8%) in Karlsruhe, Brussels, Marseille, Reims and Vienna ACCs;  
*En-route ATC capacity* (+55.1%) in Karlsruhe, Reims, Budapest, Madrid and Barcelona ACCs.

## NOTICE

### Traffic and Delay Comparisons

All traffic and delay comparisons are between report month and equivalent month of previous year, unless otherwise stated.

### NM Area

All figures presented in this report are for the geographical area that is within Network Manager's responsibility (NM area). For further information on the NM Area go to the Reporting Assumptions and Descriptions document available on the EUROCONTROL website at <http://www.eurocontrol.int/articles/network-operations-monitoring-and-reporting>.

### Regulation Reason Groupings

See Analysis for more information on colour coding. For further information on the NM Area and the regulation reason groupings, go to the Reporting Assumptions and Descriptions document available on the EUROCONTROL website at <http://www.eurocontrol.int/articles/network-operations-monitoring-and-reporting>.

### ATFM Statistics dashboard

More detailed information available via the new **ATFM Statistics dashboard**
