PARTNERING
FOR OPERATIONAL EXCELLENCE

Operational Excellence

Development of a checklist of topics to be addressed aimed at decreasing ATC workload – aligned to NF IR provisions

- Run in parallel with the airspace reconfiguration project
- Addressing a real operational and technical interoperability
- Based on best in class performance

Harmonisation of

- Operational procedures
- Application of FUA and ATFCM
- System support
- Harmonised implementation of new operational concepts and technologies

Main principle, criteria and assumptions

- As defined in the NF IR and other relevant regulatory material

Stepped implementation over RP3

- In parallel with airspace re-configuration

Implementation roadmap – Spring 2020, included in NOP 2020-2024

- Quick wins – Summer 2020
- More significant implementations as from 2021

Operational Excellence
