

i- CALL FOR TENDERS

Call for Tenders No.: 20-210537-A

Subject: Compliance of Military GNSS Receiver for STATE Aircraft Operations in a PBN environment – SESAR W2 P14”

General: EUROCONTROL* is an intergovernmental organisation with 41 Member and 2 Comprehensive Agreement States. We are committed to building, together with our partners, a Single European Sky that will deliver the air traffic management (ATM) performance required for the twenty-first century and beyond.

Specific context: Today most up-to-date modern European State aircraft are fitted with GPS PPS (Global Positioning System Precise Positioning Service) receivers. As part of an effort to rationalize avionics and to reduce costs, re-utilizing available equipment where possible, there is a need to provide sufficient evidence that those aircraft, relying on GPS PPS receivers, can fly airspace structures predicated on PBN ensuring the required levels of safety. An alternative method to evidence the compliance of the military GPS receiver towards PBN requirements will assist State authorities and other organisations when approving and publishing alternative means of compliance for State aircraft to comply with those requirements, safeguarding military-military interoperability. The request consists of launching a Call For Tenders to carry out the definition of an alternative method to evidence the compliance of the military GNSS (GPS PPS) receiver against PBN requirements in order to support the contribution of EUROCONTROL to SESAR 2020 Solution 79. The expected duration of the contract is nine months.

Who should tender: The Tenderer **shall** meet the following mandatory conditions relating to the capacity to deliver:

- Attestation that security management requirements are ensured to work on Global Positioning System Precise Positioning Service;
- Evidence of the participation in at least one project related to GPS PPS declaring so in the proposal ;

* EUROCONTROL – European Organisation for the Safety of Air Navigation
