

i- CALL FOR TENDERS

Call for Tenders No.: 21-220493-A

Title: Support to PJ14 Solution 76 Task1 – Governance of CNS Services

General: EUROCONTROL* is an intergovernmental organisation with 41 Member and 2 Comprehensive Agreement States. We are committed to building, together with our partners, a Single European Sky that will deliver the air traffic management (ATM) performance required for the twenty-first century and beyond.

Technical subject matter:

The SESAR PJ14-W2-76 Integrated CNS and spectrum addresses the CNS cross-domains consistency in terms of robustness, spectrum use and interoperability including the civil military aspects through the provision of a global view of the future Communications, Navigation and Surveillance services and the definition of the future integrated CNS architecture and the spectrum strategy. This transversal solution follows up the work achieved in Wave 1 under #14-01-01.

Task 1 of PJ 14-W2-76 “CNS service assessment” will develop the service Driven CNS approach describing how the services will be delivered for communication, navigation and surveillance and information. However, the information is limited to traffic awareness. The proposed solution will consider the different users (including general aviation, the military and unmanned vehicles), but will be focused on developing services for civil ANSPs in the ATM environment. The CNS service based assessment is linked with the performance based concept.

EUROCONTROL leads PJ 14-W2-76 task 1 of a group of stakeholders representing a large variety of ANSPs and services providers. The conclusion of the work performed for PJ 14-W2-76 task 1 will be provided for future consolidation in the D2.1.100 deliverable.

**NETWORK
MANAGER**

Performance based and service based concepts are already known concepts in industry. However, their implementation in ATM is new to the partners of the task. Therefore, the partners team requires support and additional expertise on specific topics related to the implementation of these concepts, namely governance and standardisation.

The support requested in this contract will be used to provide state-of-the-art solutions in deliverable D2.1.100 for proper governance and areas of opportunities for the future CNS services.
