

SMART & SUSTAINABLE EU AVIATION

Evolution of the European CNS infrastructure

WAC. 22 June 2022

Christine Berg
Head of SES Unit
Deputy Director Aviation
DG MOVE

Enlarged CNS Advisory Group

Mandate:

• Develop recommendations to ensure the best possible **organisation, management and implementation** of a CNS infrastructure, based on the high-level principles endorsed by the High level group on SES implementation (May 2020)

Composition:

- Experts from 7 European organisations
- Enlarged in June 2021 with representatives from CANSO, IATA/EBAA, ACI, ICB chair and EGHD chair (PSOs)
- Chaired by DG MOVE

Methodology

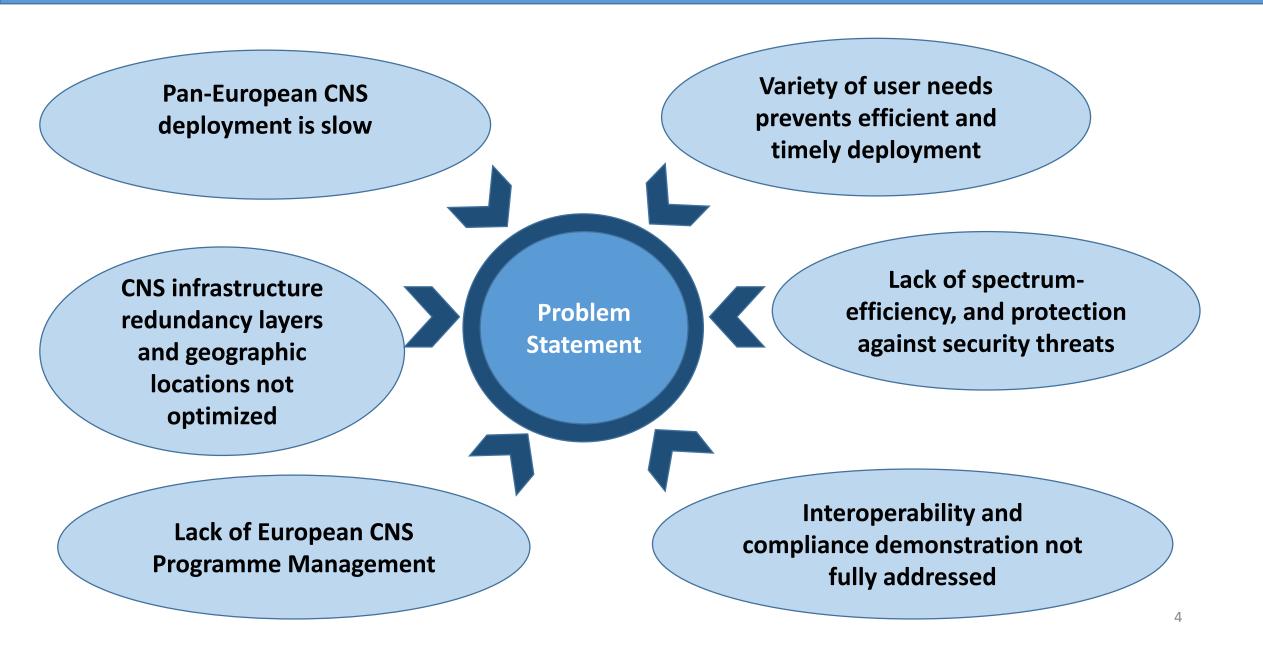

Problem Statement

12 Recommendations

18 Actions

Consultation with stakeholders at expert level (CNS workshops)

Problem statement

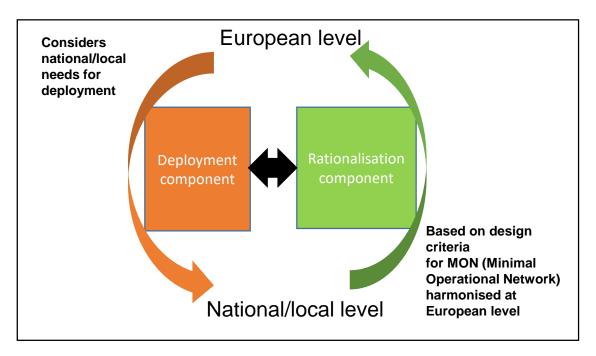

Recommendations

CNS evolution plan with decision milestones.
 ✓ Cost efficiency: Rationalisation not compromising safety and security ✓ Service oriented and performance based ✓ Integrated CNS+ Spectrum ✓ Reduce green house emissions ✓ Security ✓ Human dimension ✓ Global dimension ✓ Civil Military dimension
Demonstrate interoperability of air-ground-space infrastructure before deployment
Business case and incentives scheme
Smarter approach on regulations
CNS programme manager

CNS evolution plan

CNS Infrastructure: Airborne + Terrestrial + Satellite infrastructure

COMMINCATION

- From basic datalink (VDL-2) towards Future Communication Infrastructure enabling advanced datalink
- Towards Internet Protocol backbone and SWIM

NAVIGATION

- Rationalised conventional infrastructure
- Towards PBN and GBAS

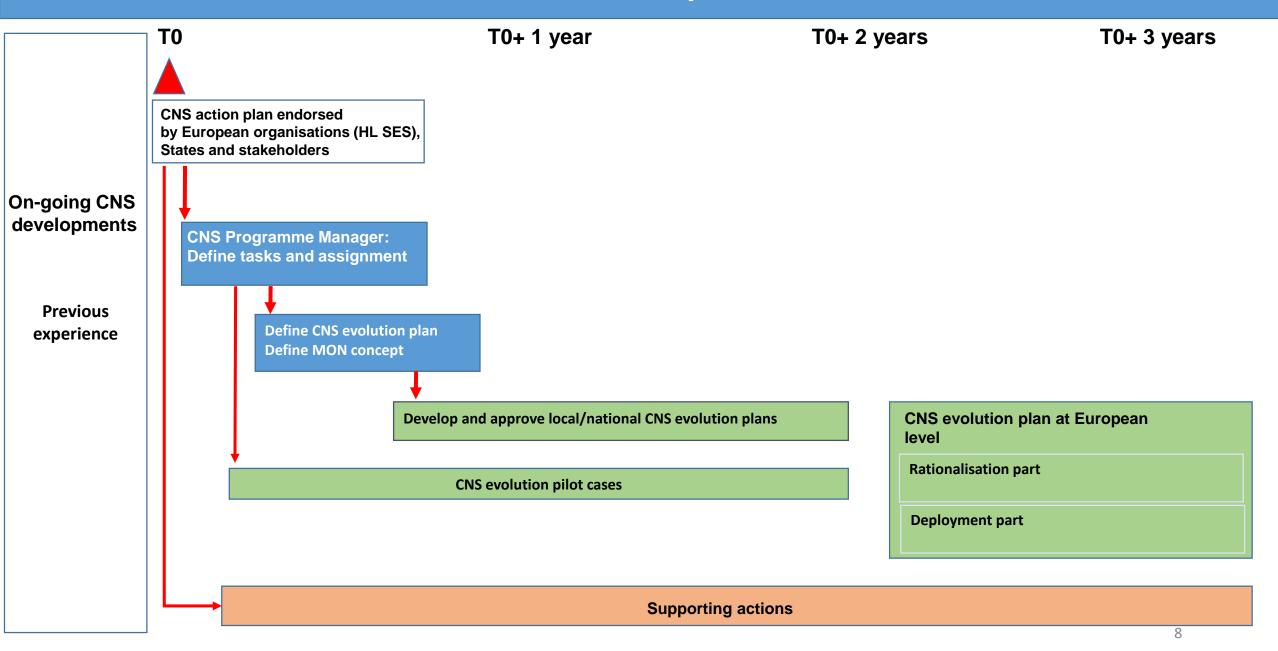

SURVILLANCE

Towards optimal mix of systems (e.g. radars and ADS B)

From a patchwork of national systems towards a European approach

Back up slides

CNS Action Plan: next steps

Next steps: Integrate the CNS Action Plan into work streams of all actors.

CINEA call for proposals

CINEA calls for proposal

CINEA calls for proposal

Performance scheme Preparation of RP 4

Infrastructure Performance Monitoring
Operational Excellence Programme
Network Manager

CNS Military strategy Military (EDA)

Regulatory framework (EASA)
Regulatory needs (CNS systems certification, security...)

Standardisation (Eurocae/SDOs)

Proposal for tasks of a CNS Programme Manager

Prepare & manage CNS Evolution Plan

- deployment and rationalisation
- MON design criteria
- decision-making milestones
- align European and local plans
- maintain, monitor plan, keep risk register (anticipate issues)

Cooperative processes

- consultation
- decision-making processes
- responsive to unique needs and limitations of actors

Support stakeholders

- EC (incentives schemes, long-term EU Spectrum Strategy)
- Stakeholders (local business cases, design MON, local rationalisation)

Ensure drivers are incorporated to CNS

- Performance-based
- Spectrum, environment, safety, and
- Local and European dimension
- air-ground-space synchronisation

Coordination tasks

- SJU (single innovation cycle)
- SDOs (close maturity gap, end-to-end interop tests)
- EASA (certification/approval)
- ICAO, FAA (global interoperability)

CNS workshop on 28 April 2022

- ☐ A well-attended event: 420 people connected. 520 registered.
- ☐ Speakers: Experts from enlarged CNS Advisory Group

- Appropriateness of the consultation process
- ☐ Support to the CNS Programme Manager function
- ☐ Clear description of the Actions
- Clear responsibility for the Actions
- ☐ Effectiveness of the Action Plan to make progress in CNS

- **86 % agree** / 14 % disagree
- **90 % agree** / 10 % disagree
 - 57 % agree / 43 % disagree
- **41 % agree** / 59 % disagree
- **80 % agree** / 20 % disagree
