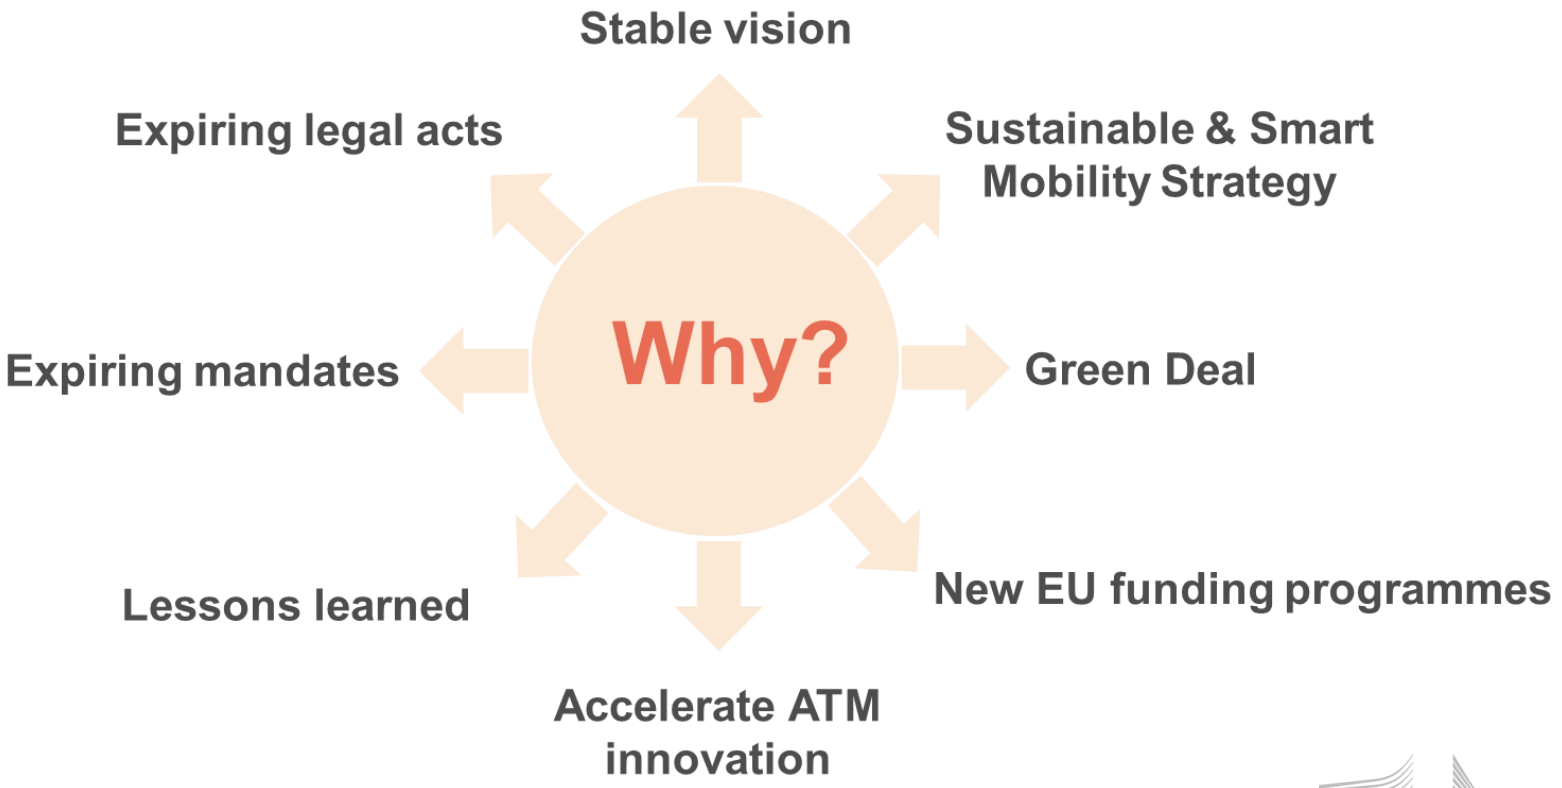
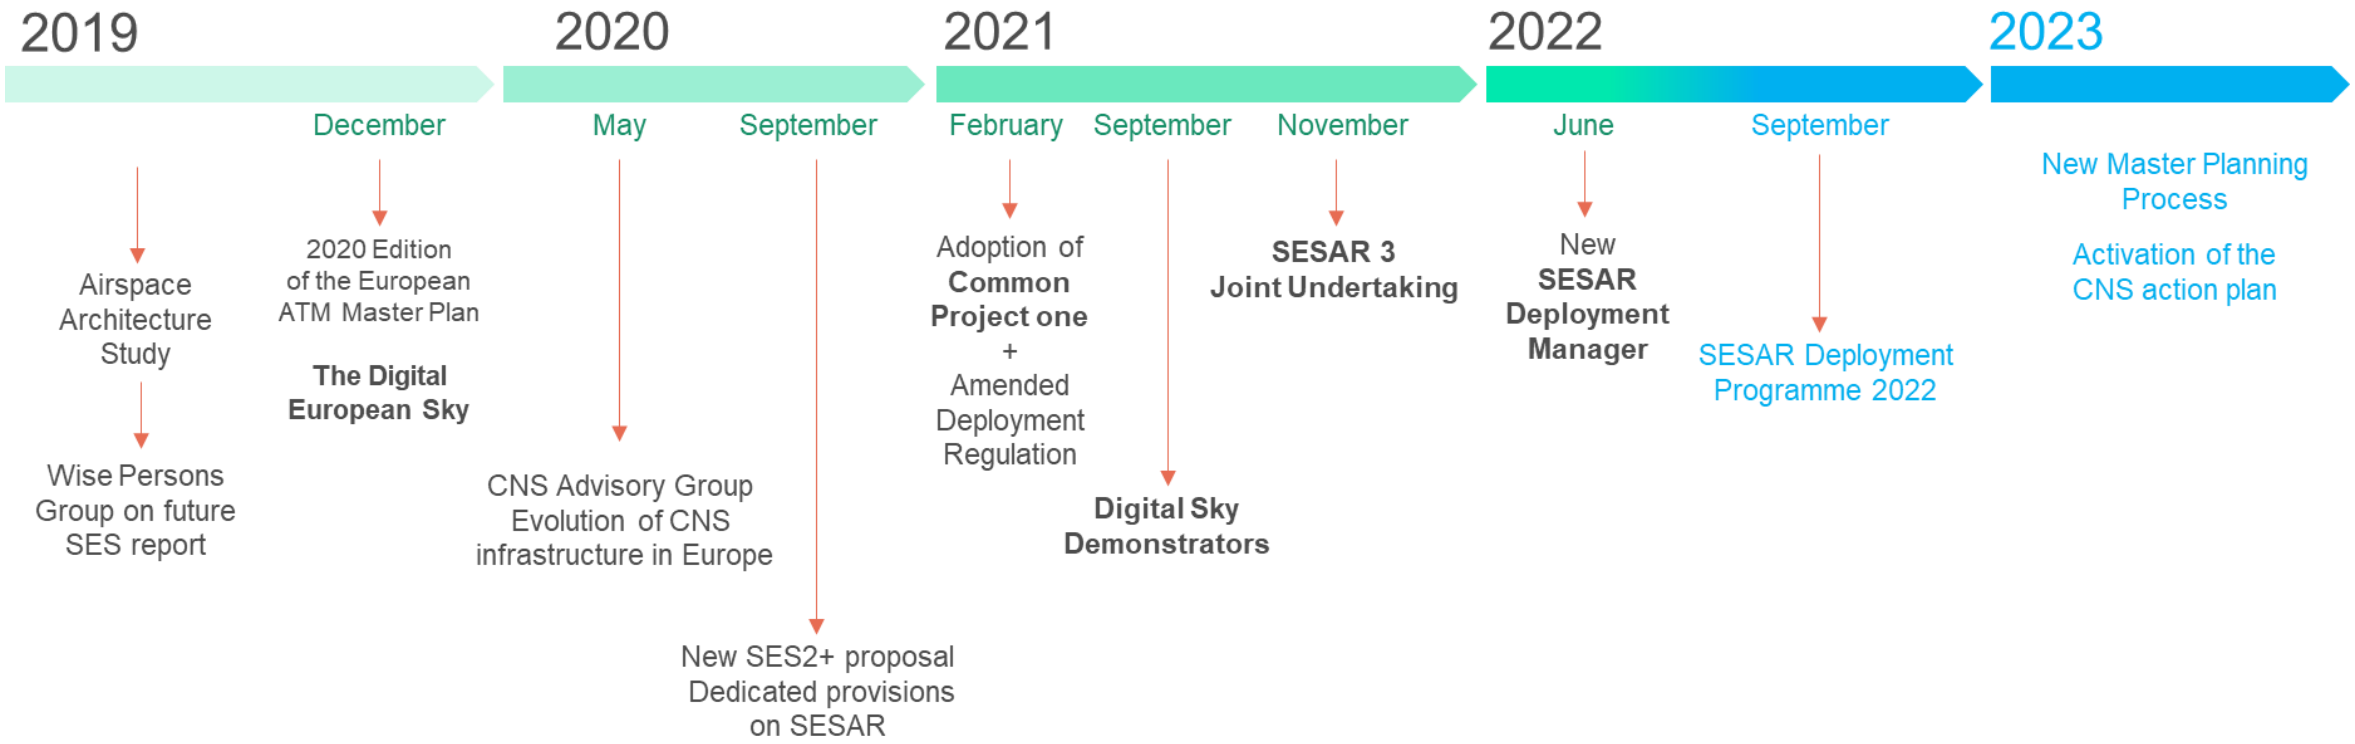
A renewed SESAR framework?



Main achievements over the past 30 months



What should be expected from SESAR 3 Joint Undertaking?

- Integrating the 55+ diverse members of the JU into single force moving towards the concept of the European Digital Sky and while standing up for it in the public sphere.
- Helping in every way possible materialising the European ATM Master Plan, especially via well chosen and managed research projects.
- Delivering the SESAR 2020 programme and ensuring the stock of mature ATM functionalities to be included into potential next generation common projects.

What should be expected from SESAR Deployment Manager?

- Ensuring the deployment of the Common Project One within the timetable foreseen in the regulation;
- Obtaining the industry wide support for further introduction of technical mandates to include the mature and relevant SESAR 2020 and/or SESAR 3 JU solutions into possible further common projects.
- Making sure that the EU financial support for the implementation of the Common Project One would be used in a most efficient manner.
