

Network Operations Plan

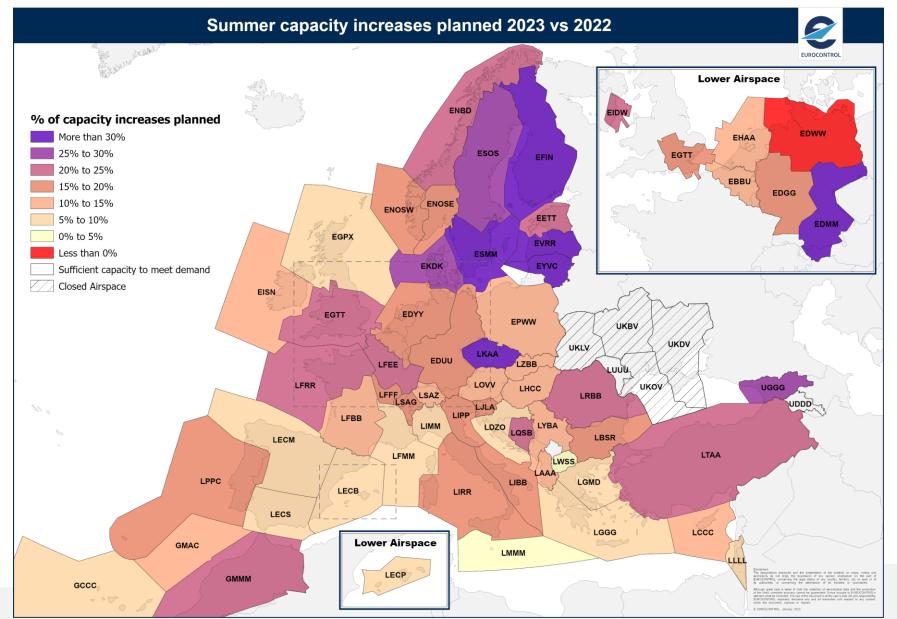

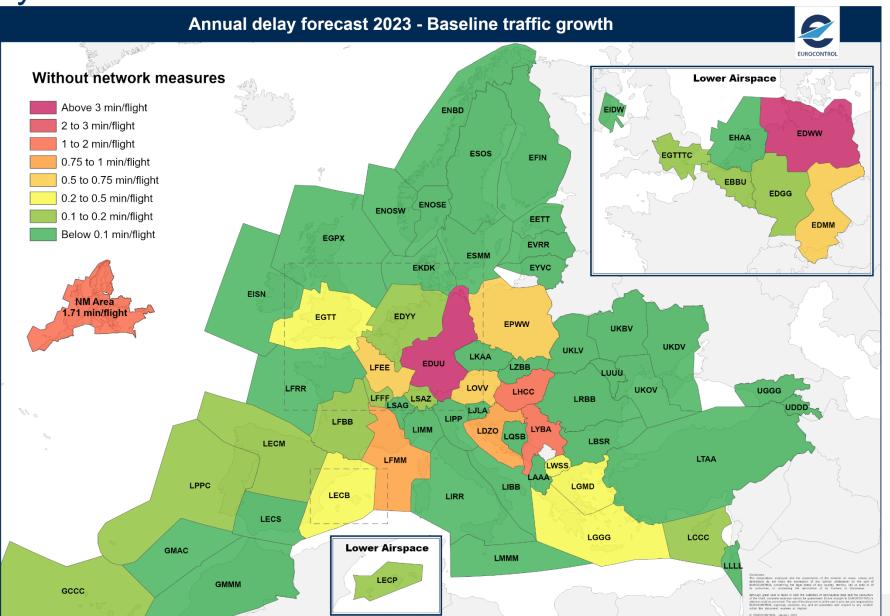

Delay forecast

Preparation of Summer 2023 – Network Measures

Improved network performance

Network measures to stabilise the network

Advanced planning in neighbouring ACCs

Address additional complexities to reduce volatility

Route length extension to be addressed

Long level caps to be avoided

Different flows to balance the traffic in the different sectors

Fair share between aircraft operators

Monitoring – Post Ops and Rolling NOP

Updating – Keep necessary measures only

Events list

- Continuously updated based on information from ANSPs, airports, MILO, news etc.
- Events classified in categories
- Keeping track of expected impact, necessary instructions for OPS etc.
- Distributed every AIRAC for a thorough check!
- Published in Rolling NOP
