

29 March 2023

# Summer 2023 Joint Approach

Air traffic in Europe this summer is expected to be up to 15% above the traffic levels of 2022.

EUROCONTROL together with Air Navigation Service Providers, Airports and Airlines, jointly agree that:

- We need to make the aviation summer 2023 manageable – failing is not an option,
- All operational stakeholders need to contribute, as individual stakeholders as well as stakeholder groups,
- Partnership with a no-blame approach is absolutely essential.

In order to meet this challenge, we jointly commit to:

- **Prioritising First Rotation**
- **Disciplined Flight Plan execution**
- **Delivering agreed capacities**
- **Realistic schedules, including turnaround times**

By jointly agreeing on this common approach and subscribing to common behaviours and contributions, we are convinced that summer 23 will be manageable, becoming a baseline for the future.
