

# iCNS Conference 2025 – Towards Innovative and Efficient CNS Service Provision

CNS Incentivization

*Lendina SMAJA, Policy Officer  
European Commission, DG MOVE*

# EU Instruments supporting CNS modernisation

## Single European Sky Framework

### Interoperability Regulations

- Ensure harmonised CNS systems across Member States
- Enable seamless operations, optimal flight paths, and enhanced capacity

### Common Projects (CP1)

- Mandate SESAR-developed CNS technologies
- Enable synchronised, interoperable deployment across the EU

### Performance & Charging Scheme

- Covers eligible CNS upgrade costs
- Encourages infrastructure rationalisation and efficiency

## SES 2+

- Promotes outcome-based charging mechanisms, not just cost recovery.
- Supports dynamic pricing models to manage demand and incentivise better performance
- Allows ANSPs more financial leeway to invest in SESAR technologies, including CNS

# EU Deployment support to ATM/CNS

## ➤ **SESAR Programme**

- Driving R&D for innovative CNS solutions
- Supports validation of new technologies

## ➤ **SESAR Deployment Manager**

- Coordinates Europe-wide CNS system roll-out
- Ensures timely and harmonised implementation

## ➤ **CEF Funding (Digital Sky Demonstrators)**

- Supports CNS deployment activities mandated under EU law
- Focused on projects aligned with SES and EASA objectives

## ➤ **Standardisation & Coordination**

- Promotion of harmonised CNS technical standards
- Establishment of a CNS Programme Manager

Thank you!
